Lab Exhaust | Dampers |
Louvers | Coils

Building owners, facility managers and maintenance supervisors are thrilled to see the breadth of Greenheck’s high-performance, energy-efficient product offering. We started out as a fan company a long time ago, but today we’re a whole lot more than that. In fact, we are everything you and your occupants need for reliable air movement, control and conditioning. Learn more at greenheck.com.

PRODUCTS & SERVICES CONTINUED

Omni Pro II is a **security and automation control system** for small commercial installations. Supports up to 176 security zones, 64 thermostats, 31 rooms for lighting control, and 16 access control readers. Also includes five serial ports for connecting to irrigation, telecom, A/V, and window covering controls. System can be controlled remotely via a smartphone or tablet. OMNI PRO II by LEVITON. Circle 231. www.leviton.com

SOPRASTAR is a reflective white roofing surface that can **reduce roof temperatures by 40-60 degrees F.** compared to traditional black options. Design requires no recoating and is resistant to dirt. Includes comprehensive warranty and is ranked by the Cool Roof Rating Council for high reflectance. SOPRASTAR by SOPREMA. Circle 233. www.soprema.us

Installed under asphalt shingles, PerfectlyClear Roof De-Ice heating panels can **prevent the formation of ice dams.** Features nail-free installation, 15-year limited warranty, and waterproof, maintenance-free design providing 10 watts per linear foot. Can be installed in new construction or retrofits. PERFECTLYCLEAR ROOF DE-ICE by CALORIQUE. Circle 235. www.calorique.com

Smooth out uneven, rough, or deteriorated interior concrete floors with Floor-Top STG, a traffic-grade, single-component, shrinkage-compensated, **self-leveling floor topping and underlayment.** The mix can be pumped or poured to install and applied up to 1 inch thick in a single application. FLOOR-TOP STG by W.R. MEADOWS. Circle 237. www.wrmeadows.com

By providing a flexible blanket of protection over exterior wall assembly and controlling the movement of air through the building envelope, Aero-Perm permeable air and water barriers can **reduce air leakage.** Available in fluid-applied and self-adhering versions for a variety of applications and can be used as air, vapor, and water control layers in rainscreen assemblies. AERO-PERM by THE GARLAND COMPANY. Circle 232. www.garlandco.com

Providing **consistent illumination without hot spots,** the LSL Series LED luminaires are designed for use in standard 15/16-inch inverted T-bar grid ceilings. Available in 2x2-foot and 2x4-foot sizes with up to 103 lumens-per-watt efficacy, CRI greater than 84, and a rated life over 50,000 hours. Luminaires include a 5-year warranty. LSL SERIES by LAMAR LIGHTING. Circle 234. www.lamarlighting.com

SL Fixtures can replace faltering lights in stairwells and garages while providing **energy use reduction up to 80%.** Available in 1-, 2-, and 4-foot lengths and lumen outputs from 1500-4000 lumens. Includes a 7-year warranty and options such as integrated occupancy sensor and battery backup. SL FIXTURES by TERRALUX. Circle 236. www.terralux.com

The Pass & Seymour Plug Load RF Receptacle works with existing occupancy sensors to **reduce facility plug loads.** The receptacle works with RF signal packs and uses an internal relay to automatically switch plug loads on or off. Meets UL498B and Federal Specification WC-596 and is available in six color choices. PASS & SEYMOUR PLUG LOAD RF RECEPTACLE by LEGRAND. Circle 238. www.legrand.us
