NEW PRODUCTS

Digital Measure

The analog tape measure has gone digital. Available in U.S., metric, or U.S. and metric markings, eTape16's large, easy-to-read digital readout is accurate to 1/16 inch or 1 millimeter. The tape toggles between outside measurement of the metal blade length alone and inside measurement, adding a three-inch width of the tape measure case to the readout. There are built-in memories: "hold," which retains a measurement even after the blade has withdrawn into the case, and two long-term memories that will retain readings after the tape shuts off and until they are overwritten.

Retrofit Rebate

Energy Star has introduced a Luminaire 2.0 Specification providing coverage for LED retrofit of ceiling mount- and wall sconce-style fixtures. New products from Terralux qualify for the new rebate. Terralux SR Series products are Energy Star certified as LED retrofit kits. The existing lamp holders and ballasts are removed, upgrading the fixture and preventing pin-CFLs from being reused in the future.

More Runtime

Bosch BAT415 12V Li-ion 2.5 Ah offers cylinder-shaped battery that delivers 25 percent more runtime without increasing overall battery size and weighs .40 pounds. The battery offers single-cell monitoring, which maximizes the performance of each individual cell. Target applications for 12V tools using the Bosch BAT415 battery pack include sawing, cutting, sanding, drilling and screw driving. The BAT415 is compatible with the complete Bosch 12V tool system.

Reversible Fans

Tjernlund Products Inc. offers a pair of energy-saving fans that rid areas of stale, musty or smelly air and draw in fresh outside air. Xchanger Model X2R can be connected to an outside intake/exhaust hood with 6-inch ducts so it can be installed in a different room than where the outside wall hood is located. Model X2D is designed for mounting directly next to an outside wall. Both models feature two reversible 90 CFM fans that can be positioned to move air in either direction. The user has three options: exhaust air from the interior, draw outside air into the home or reverse one fan for a balanced air exchange.

Timeline Camera

Work Zone Cam has added new software to go with its 18 megapixel construction camera. With a quick click-and-drag along the new timeline bar, users can access images from any point in time to check on jobsite progress. Work Zone Cam systems are wireless, all-weather digital SLR cameras.
