

New LED Light Engine Series for OEM and Retrofit Wall Sconces

Terralux has announced the release of a new series of energy efficient LED light engines.

SR308 and SR312 series products are an easy-to-install LED upgrade for use in commercial wall sconces. They are a UL recognized component (UL 8750), making them suitable for use in new fixtures by OEM lighting fixture manufacturers. They are also UL certified as LED Retrofit Kits (UL 1598C) for upgrade of existing incandescent or ballasted compact fluorescent (CFL) lighting fixtures to energy efficient LED.

Introducing Custom Electronic Assemblies From Foster Transformer

Foster Transformer Company has introduced its custom electronic assembly capabilities. Expanding from its flagship transformer product line, Foster is now providing complete power supply and control box assemblies. Complete linear, linear regulated, and ferroresonant power supplies; AC distribution boxes with relays and overload protection; designs incorporating NEMA enclosures; and fully encapsulated products to withstand the harshest environments are among the products Foster can provide to streamline its customers' operations. Foster can also integrate wiring harnesses, private label, and package for direct shipping.
